

# JAIL PROFILE SURVEY

## EXPLANATION OF RESULTS

The following link titles contain the Jail Profile Survey results for the second quarter of 2005. **Quarterly Totals** contains the second quarter totals based upon the monthly and quarterly data submitted to us by the participating jurisdictions. The next six (6) link titles show the trend data for variables we have been tracking for the last ten years (**Average Number of Persons Booked**, **Average Length of Stay**, **Average Daily Population**, **Percentage Non-Sentenced**, **Non-Sentenced ADP**, and **Sentenced ADP**). The remainder of this page provides explanations and clarifications of the data presented.

### **Quarterly Totals** link

- Unless otherwise noted, “projected totals” are based upon the average per day for the variable in question. For example, there was an average of 79,186 inmates per day in local jails (excluding Type I’s) during the three-month span of April to June 2005.
- For some variables (other than ADP), we did not receive complete data from all jurisdictions. In such instances, we used statistical procedures to estimate the statewide total.
- The number for “Bookings” is the average of the monthly totals for April, May, and June.
- For the following variables, the numbers presented are the totals as of the mid-quarter (i.e., May 15, 2005); Pretrial Release, Early Release, 2 and 3 Strikes, Felony Warrants, Misdemeanor Warrants, Juveniles in Custody and Undocumented Aliens.
- “Assaults” is the total number of serious inmate assaults on staff (resulting in a crime report), statewide, during the second quarter of 2005.

### **Average Number of Persons Booked**, **Average Length of Stay**, **Average Daily Population**, **Percentage Non-Sentenced**, **Non-Sentenced ADP**, and **Sentenced ADP** links

- The data in the 10-Year Summary tables are based upon survey data which the Board has gathered since the early 1980’s.
- Prior to 1995, yearly averages were reported to the Board on an annual basis. Yearly averages from 1996 to the present time have been the average of the 12 calendar months. In 1995, the yearly figure reported is the fourth quarter average, since we do not have data from the first three quarters.
